DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group 1 - Figures 1 and 2, and Group 2 - Figure 3

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 34-38, 40, 41, 43, 45-46, and 48-49 read on Group 1

Claims 39, 44, and 47 read on Group 2

The following claim(s) are generic: Claims 1-33, and 42

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The invention have different injection systems that are controlled differently.

Specification Observations

4. Examiner would like to note the following observation. The canceled claims 1 and 12 are still referenced in disclosure. Claims reference in the disclosure cannot be relied upon to comply with 37 CFR 1.71 and 37 CFR 1.73.

Claim Observations

5. Examiner would like to note that the used of the phrase "carbureted fuel" in an invention not having a carburetor is confusing. Clarification as to the meaning of "carbureted fuel" is requested.

Conclusion

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
